

BRIAN OMONDI

Nairobi, Kenya | yubraotieno@gmail.com | +254748928735

Senior Software Engineer with over 3 years of experience in backend and full-stack development, specializing in automated testing, code evaluation, and system debugging. Experienced in supervising AI-generated code, designing robust unit tests, and validating complex systems using Docker and modern development frameworks.

EXPERIENCE

JAN 2021-
JUNE 2023

FULL-STACK SOFTWARE ENGINEER, TECHNOVATE SOLUTIONS

- ☐ Developed and maintained backend services using Node.js and Python, ensuring high performance and scalability.
- ☐ Implemented automated testing frameworks to validate code quality and detect defects early.
- ☐ Collaborated with cross-functional teams to assess technical feasibility and troubleshoot complex systems.
- ☐ Managed Dockerized development and deployment pipelines to streamline testing and release processes.

OCT 2024-
CURRENT DATE

SENIOR SOFTWARE ENGINEER / AI CODE EVALUATOR, MERCOR (PROJECT-BASED CONTRACT)

- ☐ Reviewed domain-specific prompts and assessed feasibility of AI-generated code across multiple technical stacks.
- ☐ Supervised model outputs and validated execution in Docker environments to ensure reliability.
- ☐ Designed and implemented 40–60-unit tests per evaluation set to confirm code performance and robustness.
- ☐ Conducted peer reviews of unit tests for completeness and technical rigor.
- ☐ Provided structured technical feedback to enhance AI code generation workflows.

EDUCATION

JULY 2020-
SEPTEMBER
2025

W3SCHOOLS CERTIFICATIONS – SOFTWARE DEVELOPMENT & PROGRAMMING CONCEPTS

- Completed multiple courses covering HTML, CSS, JavaScript, Python, SQL, and backend frameworks.
- Gained hands-on experience in modern software development concepts, including responsive web design, APIs, and full-stack development workflows.

SEPTEMBER
2024-CURRENT
DATE

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY, (CUK)

An IT student at The Cooperative University Of Kenya; being recognized for excellence in software engineering and systems design.

SKILLS

- Backend & full-stack development (Node.js, Python, Java)
- Automated testing & unit test design (Jest, Mocha, PyTest)
- Docker containerization & workflow validation
- Code debugging, technical feasibility analysis, and performance optimization
- Strong attention to detail and ability to provide structured technical feedback

ACTIVITIES

- Active participant in open-source projects focused on AI and software testing
- Contributor to developer communities and technical discussion forums, sharing expertise in backend engineering and code evaluation
